BIO-TIC

The Industrial Biotech Research and Innovation Platforms Centre - towards Technological Innovation and solid foundations for a growing industrial biotech sector in Europe

Informationen zum Projekt

Homepage des Projektes

The BIO-TIC project has an ambitious goal: driving technological innovation and building solid foundations for a growing industrial biotechnology sector in the EU. This 2.8 million project (2 million funded by the European Commission) is built on three pillars: an online industrial biotech community, an assessment of biomass and sustainability in industrial biotech, and an action plan for industrial biotech in Europe.
