

## ISC3 Innovation Hub

The ISC3-Innovation Hub will initiate and support innovation in the field of sustainable chemistry to contribute to the urgent societal challenges

### Projektbeginn:

May 2017

Telefon: 069 7564 -Durchwahl

Dr. Alexis Bazzanella (Director ISC3 Innovation Hub) - 343

e-mail: [alexis.bazzanella@dechema.de](mailto:alexis.bazzanella@dechema.de)

Dr. Thomas Homburg (Innovation Manager ISC3 Innovation Hub) - 384

e-mail: [thomas.homburg@dechema.de](mailto:thomas.homburg@dechema.de)

Juanita Halblaub (International Relations Manager ISC3 Innovation Hub) -668

e-mail: [juanita.halblaub@dechema.de](mailto:juanita.halblaub@dechema.de)

Silvia Nikova (Start-up Relation & Communication Manager ISC3 Innovation Hub) - 667

e-mail: [silvia.nikova@dechema.de](mailto:silvia.nikova@dechema.de)

Astrid Ewaz (Project Manager/Events ISC3 Innovation Hub) -623

e-mail: [astrid.ewaz@dechema.de](mailto:astrid.ewaz@dechema.de)

ISC3 is an independent, international institution promoting and developing sustainable chemistry solutions worldwide. Chemistry is facing the biggest challenge in its history: Basically, it has to reinvent itself in order to progress towards sustainable chemistry and a circular economy. This implies new business opportunities, new

jobs, and a key contribution to achieve the UN Sustainable Development Goals. The ISC<sub>3</sub> is committed to shape this transformation in cooperation with all stakeholders.

Innovation in chemistry enables progress in areas as diverse as energy supply and storage, mobility, consumer products, agriculture, or health. Innovation in chemistry is therefore crucial far beyond the limits of the chemical industry. Located at DECHEMA in Frankfurt, Germany, the ISC<sub>3</sub> Innovation Hub supports innovation in the field of sustainable chemistry to contribute to the urgent societal challenges. Jointly with a global network of partners, the ISC<sub>3</sub> catalyzes tech transfer from science to industry and between regions and countries. One of the core innovation activities is the ISC<sub>3</sub> Global Start-up Service supporting entrepreneurs in becoming Sustainable Chemistry Changemakers. The annual ISC<sub>3</sub> Innovation Challenge awards outstanding projects from all over the world and promotes the most promising innovative solutions in the field of sustainable chemistry. The award ceremony and presentations of the finalists is held in the frame of the Investor Forum. The Investor Forum organized yearly by ISC<sub>3</sub> Innovation Hub, brings together founders, investors, scientists as well as decision-makers from industry and politics, with the aim of supporting and exploring financial mechanisms for sustainable chemistry innovations, as well as connecting innovators with potential international investors through pitching sessions and innovation showcases of cutting-edge entrepreneurs and speed dating.
