INVITATION

ICSHM 2017 will act as a show case of self-healing materials and concepts from all over the world. Therefore, the programme will reflect both mechanisms, materials, characterisation, processes and the huge potential of self-healing materials in industrial applications. Parallel to this, topical workshops will be held, for young scientists as well as for industry delegates.

Join us and be part of ICSHM 2017!

With best regards
