Gesellschaft für Chemische Technik
und Biotechnologie e.V.

INVITATION

14 – 16 October 2016
Halle 400, Kiel/Germany

1st Green Solvents Workshop Fundamental Knowledge and Practical Know-How for Advanced Fluids

CONFIRMED LECTURERS:

Arno Behr/Andreas Vorholt	TU Dortmund/D
Hans-Jürgen Federsel	AstraZeneca, Macclesfield/UK
Andreas Jupke	RWTH Aachen/D
Shu Kobayashi	The University of Tokyo/J
Walter Leitner	RWTH Aachen/D
Ken Seddon	The Queen's University of Belfast/UK
Peter Wasserscheid	University of Erlangen-Nuremberg/D

You will find more information at

INVITATION

Within the context of this year's Green Solvents Conference the 1st Green Solvents Workshop will be offered.

The target of the workshop is to provide the background knowledge of different advanced fluids and green solvents especially for PhD Students, Post-Docs and early stage researchers. This offers the unique chance to get a close insight in the topic of advanced fluids given by well known experts from academia and industry. The prospective lectures cover molecular and engineering principles of non-conventional solvents, comprising aqueous phases, ionic liquids and supercritical fluids, among others. Also the context of safety and toxicity as well as the application of different solvents in industrial processes will be discussed. Especially the hands-on work with different tools for the use of advanced fluids in practical examples will be discussed intensively in problem sessions.

We are welcoming you in Kiel for the 1st Green Solvents Workshop.

Supported by

8th Green Solvents Conference

will take place just after the Workshop
from 16 – 19 October 2016 in Kiel/Germany.
