

ALEXANDER

Mucus Permeating Nanoparticulate Drug Delivery Systems

Informationen zum Projekt

[Homepage des Projektes](#)

ALEXANDER - Mucus Permeating Nanoparticulate Drug Delivery Systems - was a large-scale collaborative research project within the 7th European Framework Programme for Research and Technological Development.

The project ran from April 1, 2012 to March 31, 2016.

Within ALEXANDER, 14 partners from industry and academia have joined forces, combining leading expertise in chemistry, biochemistry, pharmacy, chemical engineering, pharmaceutical technology, molecular physiology, biopharmaceutics, toxicology, drug development and project management.
