

KetBio

KetBio - A novel cluster model to bring KEY ENABLING BIOTECHNOLOGY research closer to markets and society
Infos zum Projekt

Projektbeginn:

October 2017

Informationen zum Projekt

[Homepage des Projektes](#)

The objective of KETBIO is to speed up the process of industrial exploitation and uptake of EU-funded KET Biotechnology project results by establishing a novel KET biotechnology cluster and delivering an innovative impact acceleration programme with and for the cluster, thus maximising (1) access to existing technology and its transfer activities and new cooperation partners throughout Europe for biotechnology projects, (2) exploitation of synergies and sharing of best practice beyond the original biotechnology projects scope, and (3) streamlining of activities of common interest relevant to biotechnology projects.
