

M4CO2

Energy efficient MOF-based Mixed Matrix Membranes for CO2 Capture

Informationen zum Projekt

[Homepage des Projektes](#)

M⁴CO₂ is a large-scale collaborative research project within the 7th European Framework Programme for Research and Technological Development. The project started January 1, 2014. 16 industrial and academic partners from 8 European countries have formed a consortium combining leading expertise in catalysis, membranes, polymers and reaction engineering.
