

# GUIDELINES FOR POSTER PREPARATION

1<sup>st</sup> workshop on Virus Dynamics  
July 15-16, 2013 • DECHEMA-House • Frankfurt am Main, Germany

---

## General Information:

The posters will be presented and numbered according to the numbers in the final programme of the conference. The final programme will be put online and handed out on-site.

The **poster number** is mounted by the organizers on top of the board.

The **author's name, address, e-mail address** and **the title of the paper** are to be indicated on the top section of the poster.

Material to mount your poster will be supplied by the organizers. It is the presenter's own responsibility to set-up the presentation on the assigned poster board and remove it at the end of the conference.

Writing or painting on the poster board is not allowed.

## Poster display times:

All posters may be presented throughout the "1<sup>st</sup> workshop on Virus Dynamics". Poster's authors are asked to be present at their own poster during the breaks for discussion.

## Preparation of the Poster:

As a major guideline it is proposed to make the poster intelligible in itself, even in the absence of the author. It is suggested to divide the contents of each poster into **introduction, results** and **conclusions**, with a summary listing the pertinent results and conclusions.

The poster should be legible from a distance of 2-3 meters. Therefore, the **minimum size** should be:

- 20 cm for graphs;
- 3 cm for the paper's title and the names/adresses of the authors in the heading line;
- 1.5 cm for sections headings such as introduction, results, labelling of figures and tables;
- 0.8 cm characters in height for further text.

Line spacing: 1.1 cm at minimum; 10 of such lines correspond to one figure.

Please use colours, symbols and schemes for improved clarity.
